Swiss foreign trade

2021: Exports soar to a new high

While the COVID-19 pandemic cast a massive shadow over Swiss foreign trade in 2020, it proved to be extremely robust in 2021. Exports grew by 15.2% to a new record high, while imports climbed by 10.1%. The difference in the pace of growth between exports and imports caused the trade surplus to rise to a substantial CHF 58.7 billion.

In brief

- ↑ Exports: United States became Switzerland's largest buyer of goods in 2021
- ↑ Foreign trade with China at a new high
- ↑ Watches: a third more in exports and new sales record
- ↓ Imports: jewellery CHF 8.8 billion below the pre-COVID-19 level

¹years unadjusted

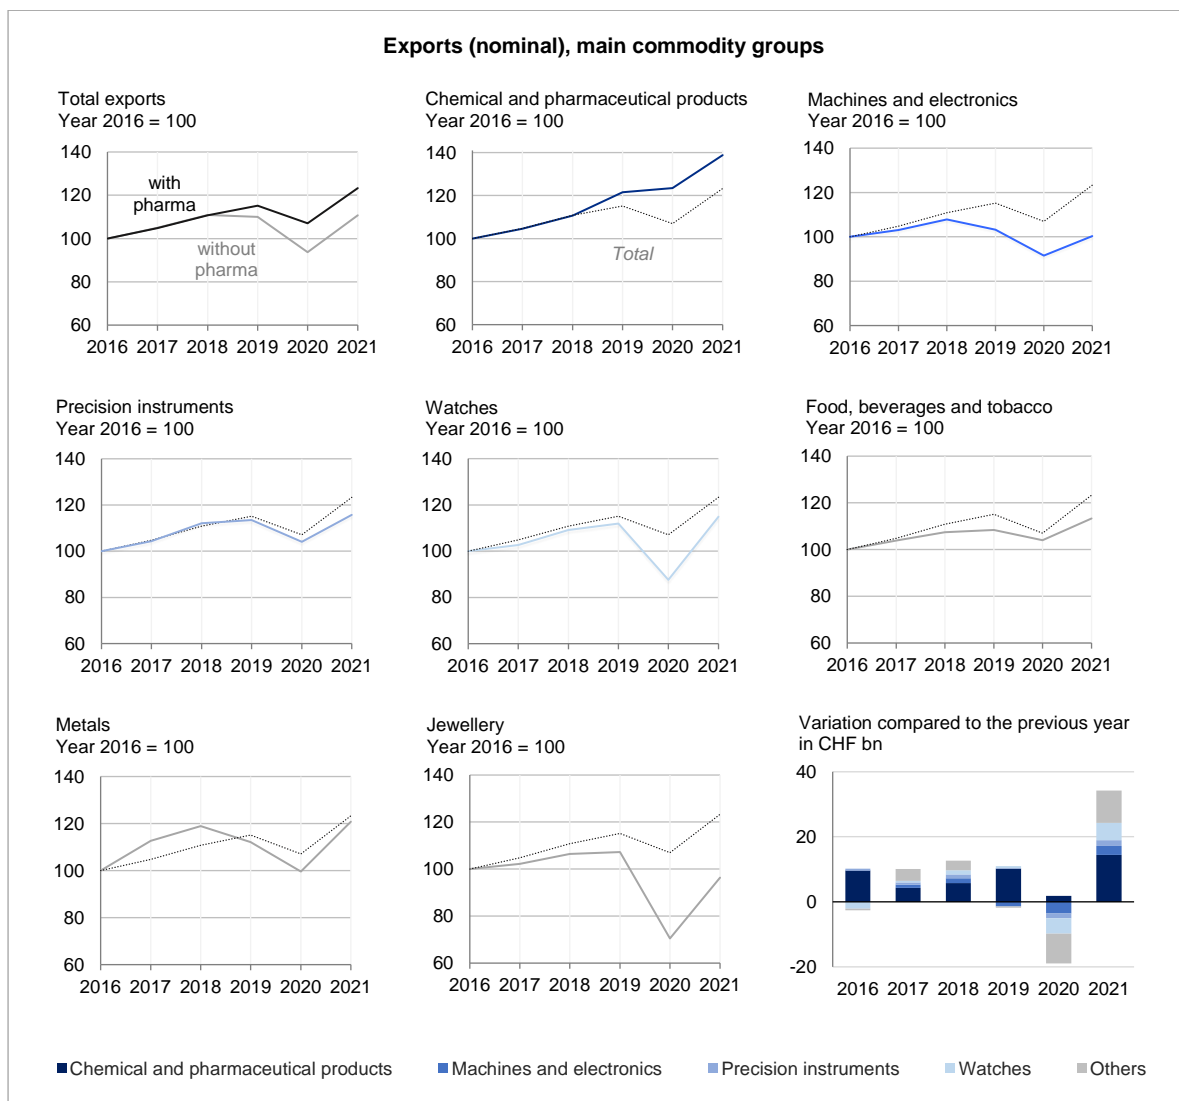

Overall trend

Exports surged by a robust 15.2% (+9.5% in real terms) to a new record high of CHF 259.5 billion over the course of the year. There was a seasonally adjusted rise of 6.0% in the first quarter of 2021, and that momentum continued in the following quarters before slowing down to +1.4% in the fourth quarter. **Imports** grew by a total of 10.1% (real: +1.1%) to CHF 200.8 billion, but still remained CHF 4.4 billion below the pre-COVID-19 level in value terms. The trade surplus expanded considerably, going from +43.0 billion francs in 2020 to +58.7 billion in 2021.

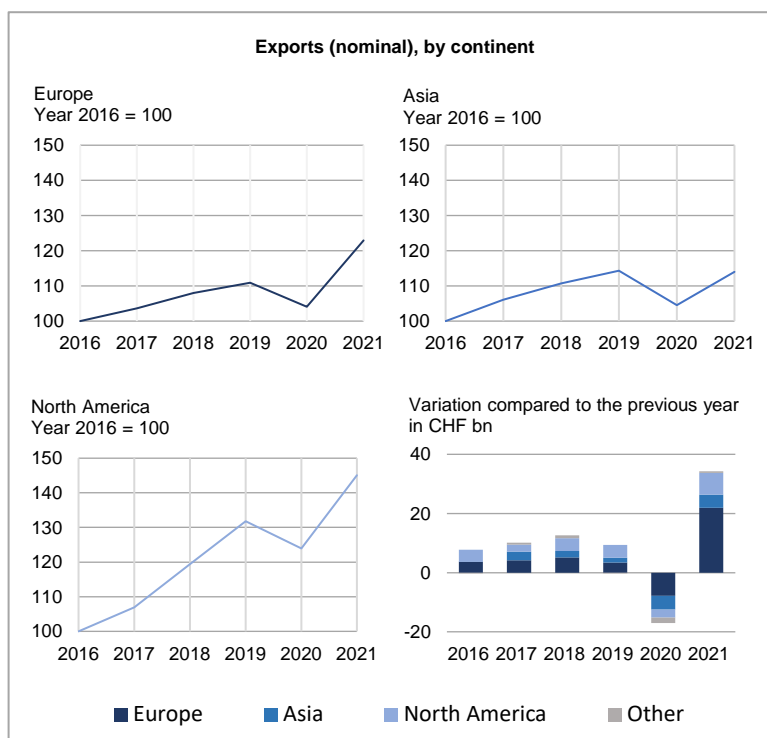

Immunological products accounted for a quarter of the total increase in exports

Following the historical slump caused by the pandemic the previous year, all export sectors were up again in 2021. With an increase of CHF 14.4 billion, the biggest contribution came from **chemical and pharmaceutical products** (+12.4%). Here, immunological products were up by a quarter or CHF 8.8 billion. The rise in **watches** was also impressive; their shipments climbed by a third, or CHF 5.3 billion, to a new annual high. While **jewellery** exports likewise grew at a similar pace (+2.8 bn), they remained CHF 1.2 billion below the pre-COVID-19 level. After two negative preceding years, exports of **machines and electronics** climbed by a tenth (+2.7 bn), while those of **metals** gained a fifth (+2.6 bn). Exports of **precision instruments** rose by 11.2%, or CHF 1.8 billion.

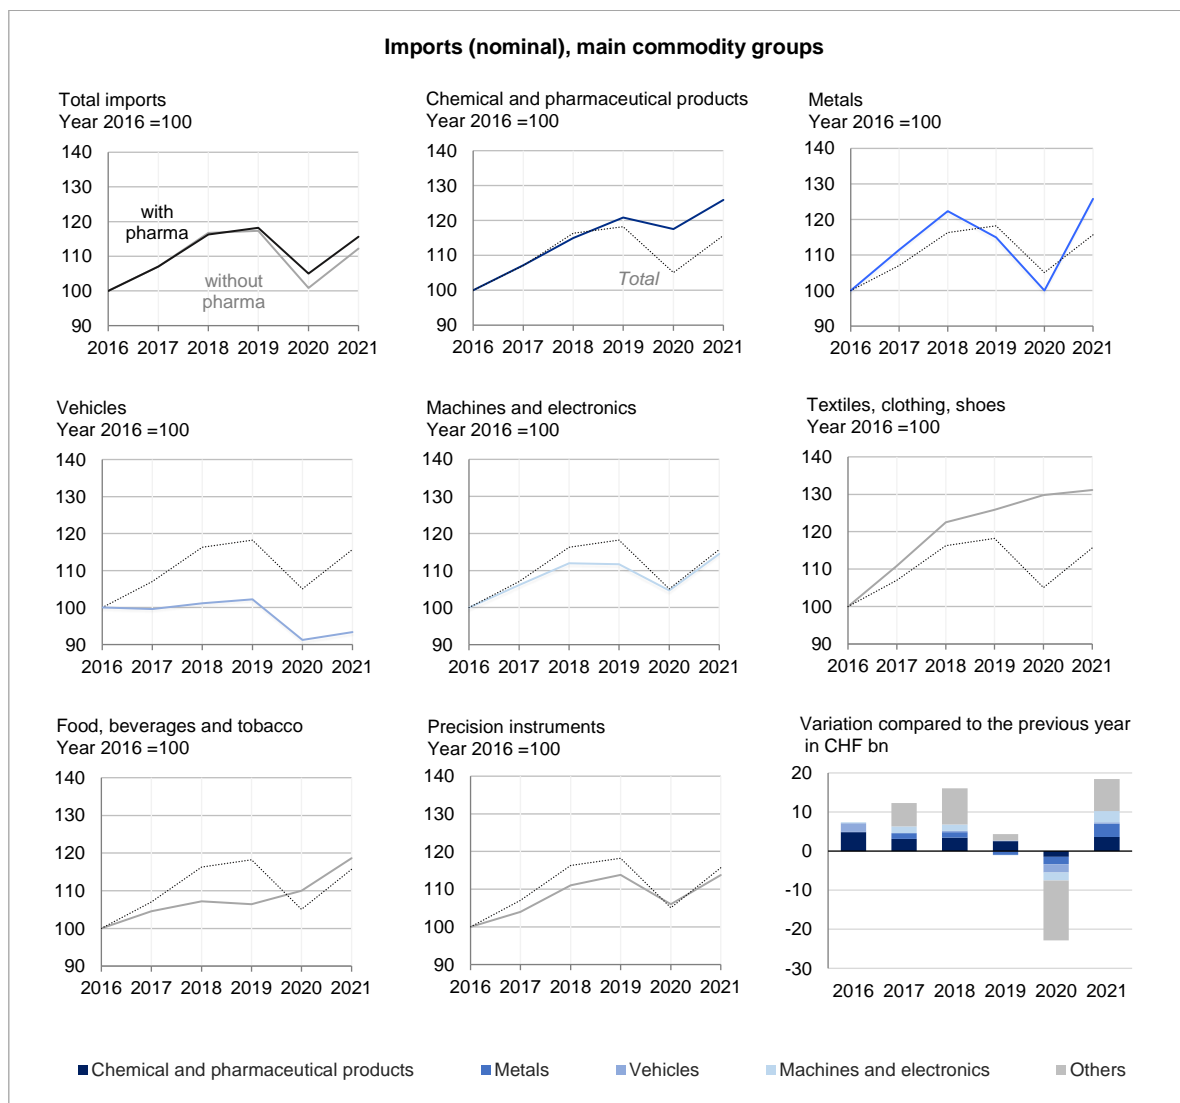

The Swiss export industry sold more goods in all three major economic areas. Double-digit growth rates were observed in deliveries to **Europe** (+18.1%, or +21.9 bn) and **North America** (+17.0%, or +7.4 bn). Shipments to **Asia** were also up by 9.0%, or CHF 4.4 billion. In the case of Asia, the increase in exports to Hong Kong (+23.0%), China (new record), Japan and Singapore was significant. In Europe, Spain stood out with a rise of CHF 5.1 billion. The cumulative increase in exports to Germany, France and Italy amounted to CHF 9.2 billion. Meanwhile, sales to the United States expanded by CHF 7.4 billion, or +18.8%, thereby reaching a new record level. At the same time, 2021 saw the United States replace Germany as the most important buyer of Swiss products for the first time since 1954.

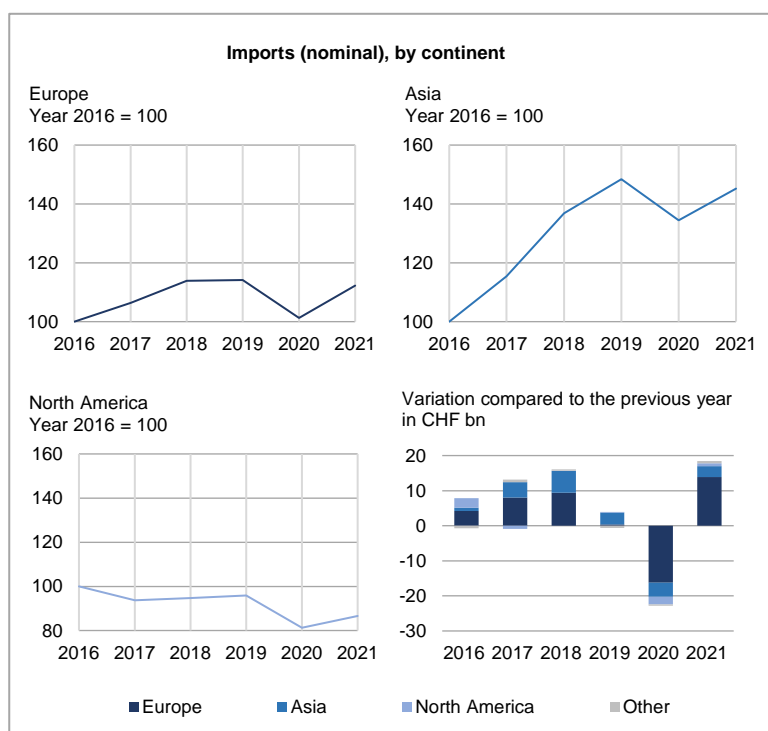

Rising prices push up imports of energy sources

On the import side, too, the entire range of goods was up. Higher deliveries of **chemical and pharmaceutical products** (+7.1%) contributed CHF 3.6 billion to the total increase, driven mainly by greater purchases of immunological products. Imports of **metals** rose by a quarter, or CHF 3.3 billion. Imports of **energy sources** posted an exclusively price-related increase of CHF 3.9 billion, or 69% (real: -1.6%). It is also worth mentioning the increase in **food, beverages and tobacco imports**, which grew by 7.9% to a new high over the course of the year. **Jewellery** and **vehicles**, which were still suffering in 2020, climbed by 2.8% and 2.4%, respectively, but nevertheless remained significantly below their pre-COVID-19 levels. Specifically, jewellery purchases were down CHF 8.8 billion (mainly gold jewellery for smelting) on the 2019 figure, while vehicle deliveries were CHF 1.7 billion lower.

Switzerland again purchased more goods from all three major economic areas. The sharpest increase was in imports from **Europe** (+10.9%), which were up CHF 13.9 billion on the previous year. Spain and France are particularly noteworthy here, with Switzerland importing a fifth more goods from each country in value terms. Germany, however, was the biggest contributor, with imports rising by CHF 5.5 billion (+11.2%). Imports from **Asia** grew by a total of 8.0%, or CHF 3.1 billion. Deliveries from China alone surged by CHF 1.8 billion to a new record level. At the same time, imports from South Korea increased by CHF 1.1 billion and more than doubled over the year. Shipments from **North America** climbed by 6.6%, or CHF 803 million (USA: +643 mn).

Important information:

This press release comments quarterly on the trend of foreign trade on a seasonally adjusted basis, changes in which always relate to the prior period. This makes it possible to focus on the trend and put short-term developments into perspective; prior-period comparisons can generally be volatile. More information can be found in our [methodological manual](#).

The text, tables and charts are also based on the provisional business cycle data (Total 1), i.e. **without** trading in gold, other precious metals, precious stones and gems, works of art and antiques.

Further foreign trade statistics can be found online in our database: www.swiss-impex.admin.ch.

The press release on Swiss foreign trade for the **January 2022** reporting period is intended for publication on Thursday, **17 February 2022** ([Release calendar](#)).

- Nominal:** At current prices, i.e. not price-adjusted
- Real:** Price-adjusted (based on averages)
- Adjusted for working days:** Takes account of the influence of individual working days (e.g. number of Thursdays per month) and other calendar-related effects
- Seasonally adjusted:** Adjusted for the number of working days and excluding seasonal fluctuations
- Product groups:** Classification according to the "[product type](#)" nomenclature
- Foreign trade sentiment:** Shows (in colour) the development or the extent of the change relative to the previous period (seasonally adjusted)
