

## Electricity production and consumption in 2023

|   | billion kWh | Change in %<br>compared to 2022 |
|---|-------------|---------------------------------|
| <u>I. Electricity production</u>                                  |             |                                 |
| - Hydropower plants:  | 40,8        | + 21,7                          |
| - Run-of-river power plants                                       | 17,5        | + 12,9                          |
| - Storage power plants  | 23,3        | + 29,3                          |
| - Nuclear power plants  | 23,3        | + 1,0                           |
| - Conventional thermal power plants<br>and renewable power plants | 8,0         | + 15,2                          |
|   | —           | —                               |
| Total   | 72,1        | + 13,5                          |
| <u>II. Consumption by storage pumps</u>                           | 5,4         | - 3,4                           |
| <u>III. Export surplus</u>  | 6,4         | -                               |
| <u>IV. Transmission and distribution losses</u>                   | 4,2         | - 1,7                           |
| <u>V. Electricity consumption</u>                                 | 56,1        | - 1,7                           |
| <u>Per capita consumption (kWh)</u>                               | 6 308 *     | -                               |
